Heorhi Sakalouski

A Senior Full-stack Developer with over 8 years of extensive experience in the IT industry, specializing in developing scalable and efficient web applications. Proficient in a wide range of technologies, including JavaScript, TypeScript, React, Angular, HTML, and CSS (SASS/LESS), C#, .NET. Demonstrated expertise in both front-end and back-end development across various domains such as finance, interior design, remote monitoring and management. Passionate on delivering high-quality features, improving project quality, and leading development efforts in dynamic environments.

Skills

- JavaScript / TypeScript
- Angular / React
- C# / .Net
- HTML
- CSS
- Node.js

Experience

September 2023 – Till now

Senior Full-stack developer, EPAM

I am currently working on a project within the finance sector, developing internal tools for analysts and traders. Throughout this project, I extensively use **C#, .NET, MSSQL, JavaScript, TypeScript, React, HTML, and CSS (SASS)** in the development process.

November 2022 – September 2023

Senior front-end developer, Planner5D

I was a part of a team developing a platform for interior design and related things. My responsibilities include creating new features and maintaining existing ones for the 2D and 3D editor, a core component of the platform. One unique aspect of this project is that we do not rely on any JavaScript frameworks, instead utilizing the OOP paradigm and design patterns, resulting in a well-structured, easily maintainable, and testable codebase for the UI. To accomplish this, I work with **JavaScript, TypeScript, HTML, CSS (SASS)**.

October 2021 – November 2022

Senior Full-stack developer, Kaseya

As a key player in the development team, I was working on an RMM system. I was responsible for delivering a few crucial for the product features and constantly improving the overall quality of the

project. My daily work required utilizing *JavaScript, TypeScript, Angular, HTML, CSS (LESS), C#/.NET Framework, MSSQL, NHibernate*.

December 2019 – October 2021

Senior Full-stack developer, EPAM

I was part of two incredible projects and equally incredible teams. As the first one, we built a complete electricity systems blueprint tool. We were able to decrease the complexity of the drafting process substantially by simplifying the drawing and checking all essential requirements on the fly. The second one related to the finance domain and market analysis (Unfortunately, I have a strong NDA for this project). In the development, I worked a lot with *JavaScript, TypeScript, Angular, NestJS, React, HTML, CSS (SASS), C#/.Net, MSSQL, MongoDB*.

April 2016 – December 2019

Front-end developer, Andersen

Successfully participated in a few projects in different domains from real-time tracking situations on the roads of San Francisco to a full featured internet banking for legal entities (this one I am proud the most as we as a team built a few projects from scratch that increased the amount of new clients for the bank significantly). During the development, I intensively used *JavaScript, TypeScript, Angular, HTML, CSS (SASS, LESS)*.

Education

July 2017

Specialist degree (specialist in software), VSU named after P. M. Masherov

GPA - 8.12, participant of programming competitions.

Activities

Created and taught JavaScript courses for students at the VSU named after P.M. Masherov. Participated in meetups as a speaker. I study foreign languages (English and Spanish).
